Allowable Subject Matter

1. Claims 1-29 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Applicants have amended the claims in compliance with the office action dated 08/02/04. The present invention relates to method for acquiring the signal including estimating the Doppler frequency and code phase shift. Particularly, prior art of record, taking individually or collectively, fails to fairly teach method and apparatus for acquiring the received signal including the claimed subject matter "the frequency shift examination is divided into a first estimation phase and a second estimation phase, wherein in the first estimation phase the selected frequency area is divided into a first set of frequencies, and in the second estimation phase a second set of frequencies is examined nearby each frequency of the first set of frequencies, that a comparison for frequencies of the second set of frequencies is performed using the received signal and the replica code, and that the results of the comparison are used to estimate a correct frequency shift" in independent claim 1 and similar claimed subject matter in independent claims 8, 15, 22 (claims 2-7, 9-14, 16-21, 23-29 depend therefrom). Thus, claims 1-29 are found to be novel and unobvious over prior art of record.
